5 Interest Calculations and Raising Periods

The applicable interest rate is the sum of the Bank's Business Low Rate Reference Rate and a risk margin determined by the Bank with regard to the application received.

Interest is calculated daily by multiplying the balance of your account by the interest rate and dividing the result by actual number of days in the year. Interest is then debited to the account in line with the chosen interest raising option.

Please note: The interest rate and interest raising dates is calculated from the day the loan is disbursed.
