

Video transcript – Introducing the Bankwest Pricing Tool

Being able to offer your clients customised pricing is important to ensure you are providing them the best deal possible. The Bankwest Home Loan Pricing Tool allows you to submit pricing requests online with access to on the spot offers in many instances.

As an accredited Bankwest broker, simply log onto the website at bankwest.com.au/brokers using your Broker ID or BK Code to access the pricing tool, via the Home Lending Portal.

Once you're in the pricing tool you simply provide us with basic client details, such as name, date of birth, and loan details and we'll provide you with a rate instantly, where possible.

In situations where we are not able to provide an offer immediately a Bankwest colleague will contact you after a review and assessment.

If you'd like to find out more about the Pricing Tool or need help with your broker codes or passwords you can speak to your Broker Development Manager or one of our support teams listed on the broker website.
