

Video transcript – Whitfords Store - Reducing our environmental impact

Anna Bevan: Our team are really proud of working in the Whitfords branch.

The branch was awarded its five star green rating because they use sustainable materials in the wall, LED lighting and was really conscious about the materials that was used when the branch was built.

Information on screen

5 Star energy rating

- Sustainable building materials
- Energy efficient monitors
- LED lighting
- Non-essential electrics switched off

Anna Bevan: My favourite feature in the Whitfords branch is definitely the sound proofing in the customer interview spaces.

They're really funky, they're really efficient, and they look absolutely fantastic, and they're a great talking point for customers.

Our team are really proud of the way it looks and feels.

It's a really comfortable environment for them to work in and they're also really proud of the fact that, actually, at the end of the day, all the lights go off, everything goes dark and we're doing our bit for the environment.

It's not easy to relocate a branch, or redesigning a branch and being able to do that with an environmentally friendly approach.

It's really, really important, I'm really proud to be part of that.
